

Hybrid IT Connect

Cohesive interconnection across your hybrid infrastructure.

Hybrid IT Connect combines the essential interconnection services needed to build a secure, scalable networking fabric for hybrid infrastructure. Combining traditional cross connects with on-demand digital connectivity, Hybrid IT Connect provides high-performance interconnection across cloud, network, and enterprise environments.

CSQUARE DATA CENTER

Hybrid IT Connect Benefits

Accelerate Hybrid Deployments

Rapidly connect workloads across cloud, colocation, and enterprise environments with click-to-provision services through the Csquare Customer Portal.

Simplify Complex Connectivity

Centralize management of multiple network connections within a single interface and order internet access, cloud connectivity, metro connectivity, and physical or virtual cross connects through the Csquare Customer Portal.

Scale as Business Demands Change

Increase bandwidth and instantly provision new services on demand without lengthy deployment cycles or hardware investments.

Enable a Connected Ecosystem

Access providers, cloud platforms, carriers, and technology service providers through a highly connected, cross-connect-dense environment.

Improve Agility

Provision, modify, and manage connectivity services in real time via the Csquare Digital Exchange software-defined platform.

Hybrid IT Connect Service Offerings

Build a seamless networking foundation that reduces cost and complexity while optimizing connectivity across your hybrid infrastructure. Customize your Hybrid IT Connect bundle from the following services:

Ecosystem Connect

The cabling, connectors, and patch panels required to connect your cabinet/cage to the data center Meet-Me-Room for interconnection – enabling the deployment of cross connects with 2 business days.

Cloud Connect

Secure connections to public cloud service providers: AWS, Azure, Google Cloud, and Oracle Cloud.

Exchange Port

Two single-mode fiber cross connects for full redundancy to link your colocation environment to the Csquare Digital Exchange fabric – opening the door to instant provisioning of connections to internet, clouds and other Csquare ecosystem providers.

IP Connect

On demand, scalable fault-tolerant internet access via multiple Tier 1 IP backbones.

Digital Cross Connects

Virtualized connections between your own environments or other colocation customers within the same data center or metro.

Enterprise Storage

Flexible, enterprise-class storage with a pay-as-you-go managed cloud solution.

Whatever you need,
we are here to help.
