

Accelerating Infrastructure for \$100B Healthcare Company Divestiture

Csquare delivers rapid, compliant data center deployment to support critical business transition under rigorous regulations.

Background

Corporate divestitures often create complex infrastructure demands—especially in highly regulated industries. In the wake of a major separation, a global healthcare and pharmaceutical company needed to rapidly establish a new data center environment. With strict regulatory frameworks and tight timelines, the high stakes spin-off required a secure, compliant solution without disrupting operations.

Challenge

Our customer faced a multifaceted hurdle to deploy a fully functional IT infrastructure under intense time pressure while meeting stringent healthcare industry regulations. The new environment had to support critical applications, ensure 100% uptime, and avoid costly Transition Services Agreement (TSA) fees associated with delays.

Solution

Csquare implemented a tailored colocation strategy designed for speed, resilience, and compliance. The phased deployment approach enabled our healthcare customer to migrate applications in alignment with business priorities while maintaining operational integrity. Key components included:

- **Standardized colocation footprint** to support a range of workloads from high-density compute to basic networking.
- **Geographically diverse Tier III data centers** that assured business continuity and disaster recovery frameworks across regions.
- **2N power architecture** for full redundancy to meet 100% uptime SLAs.
- **Integrated security and environmental monitoring** for protection and visibility across all colocation facilities.
- **High-density compute support** comprising advanced cooling and power distribution for efficient workload performance.
- **Custom network delivery** made up of diverse points of entry (POEs) to power robust connectivity and fast data transfer.

Results

We successfully delivered a seamless transition with measurable impact for this healthcare industry leader that included:

- **Successful migration of critical applications** transitioned without service disruption, meeting compliance deadlines and avoiding TSA penalties.
- **On-time implementation of infrastructure** due to extensive coordination with customer and bespoke design elements.
- **Partnering with the customer's engineering team** to meet all regulatory and risk control requirements.
- **Seamless integration** of our Data Center Infrastructure Management (DCIM) system with the customer's Information Technology Service Management (ITSM) platform to deliver real-time performance insights.

SNAPSHOT

Industry

Healthcare and pharmaceuticals

Use Cases

- Divestiture infrastructure enablement
- High-density compute support
- Regulatory compliance and risk mitigation

Objectives

- Rapidly deploy a compliant IT environment to support a \$100B+ divestiture
- Avoid costly Transition Service Agreement (TSA) fees through accelerated implementation
- Ensure uninterrupted operations and regulatory compliance during migration

Results

- Delivered new, fully independent infrastructure on time and within budget
- Enabled seamless migration of critical applications
- Maintained business continuity with no TSA penalties
- Achieved full compliance with healthcare and pharma regulations

About Csquare

Csquare is a preeminent colocation provider with a proven track record of providing highly reliable data center services. Prioritizing security, reliability and superior customer service, Csquare offers flexible data center solutions backed by a 100% uptime guarantee for thousands of diverse organizations across all industries.
